- give children, young people and/or their carers an accepted means of challenging decisions
- to ensure complaints are acted upon, resolved quickly and within timescales as close to the point of service delivery as is acceptable and appropriate.
- to provide an additional means of monitoring performance and improving service quality.

10. Equalities and Community Cohesion

The social care complaints procedure for children and young people has been subject of an Equality Impact Assessment and an improvement plan and action plan is to be devised in line with the Race Equality Scheme. The legislation applies to all children. There is also a duty to record the take-up of advocacy services and to monitor the effectiveness and independence perception of services.

18.8 Monitoring and quality assurance

- 18.8.1 The CCU has a system which captures a range of complaints information, including the nature of the complaint, the action taken, the outcome of each complaint including whether there was compliance with the time periods specified in Regulations. The information captured from this monitoring is used in a number of ways including:

- The dissemination of this information to line managers
- Its use as a measure of performance and means of quality control; and
- Information derived from complaints about services subject to Statutory Regulation, or where services purchased under contract are concerned, to the person responsible for monitoring the contract.

- 18.8.2 The information collected during the monitoring of process and individual complaints provides invaluable feedback on performance management and operational matters such as how policies are interpreted by staff and service users. It helps to identify areas that need improvement and where training is required.

- 18.8.3 This is in addition to current practice of attending senior management meetings to highlight the importance of effective complaints handling in particular with regard to the statutory timeframe.
